EXPERIENCE

Gallagher – Software Engineer

Nov 2021 - PRESENT

- Developed and optimized Angular applications, ensuring seamless integration of various components and efficient HTML bundle optimization.
- Built responsive and interactive user interfaces using HTML5, CSS3, JavaScript, Bootstrap, and jQuery for multiple products, ensuring high performance, accessibility (A11y) standards, and user engagement.
- Created reusable components, integrated libraries, managed form validation, API integration, and CRUD operations to support dynamic data interactions.
- Worked with .NET Web API to design and implement RESTful services for backend integration.

PROJECTS

Delta

Delta is a benefits platform that boosts employee engagement and productivity by consolidating benefits and rewards into a unified data dashboard. It helps employees select suitable benefits and provides well-being and lifestyle options.

Tech Stack: Angular, Bootstrap, jQuery, Sass, .NET Web API

Delta Content Management System

The Content Management System allows employers to configure content based on eligibility criteria, theme and customize the employee portals for employees. This system enables app customization based on specific requirements without needing developer assistance.

Tech Stack: Angular, Bootstrap, jQuery, Sass, .NET Web API
